<https://lobanov.github.io/ihor-loba>

ihor.loba@gmail.com

Dynamic and creative Front-End Developer with a passion for crafting digital experiences. I thrive on the intersection of design and technology, constantly seeking innovative ways to improve user interactions and enhance visual appeal. With a proven track record of delivering user-centric solutions, I bring a mix of artistic creativity and technical expertise. Through effective collaboration and a keen attention to detail, I strive to create interfaces that not only captivate users but also drive business objectives.

## EXPERIENCE

### UI Front-End Developer (2022-Present)

ShelfNow

- Developed interactive UI components using JavaScript, enhancing user engagement and site functionality
- Optimized front-end performance, improving load times and user experience through efficient scripting and DOM manipulation
- Maintained codebase with Git, facilitating smooth collaboration and version control
- Collaborated closely with the marketing team and backend developers to strategize and schedule website releases
- Managed the maintenance and updates of both new and existing pages/components
- Demonstrated strong communication skills, fostering effective collaboration across teams
- Performed thorough website testing and debugging to ensure optimal functionality and usability
- Designed and developed new layouts and components using Figma, contributing to ongoing design enhancements

### HTML/Markup Developer (2020-2022)

ReliablePSD

- Built high-quality, scalable HTML/CSS markup from scratch/improved existing layouts by identifying and fixing markup-related bugs
- Conducted regular code reviews, maintaining high code standards and mentoring junior developers to ensure consistent, maintainable codebase
- Optimized markup for accessibility, SEO, and performance, contributing to improved user satisfaction and technical KPIs
- Ensured cross-browser and cross-device compatibility by following standardized HTML/CSS best practices, delivering consistent user experience
- Collaborated closely with QA engineers to validate frontend implementation and address UI/UX inconsistencies early in the process
